

Don't worry if they get wet.

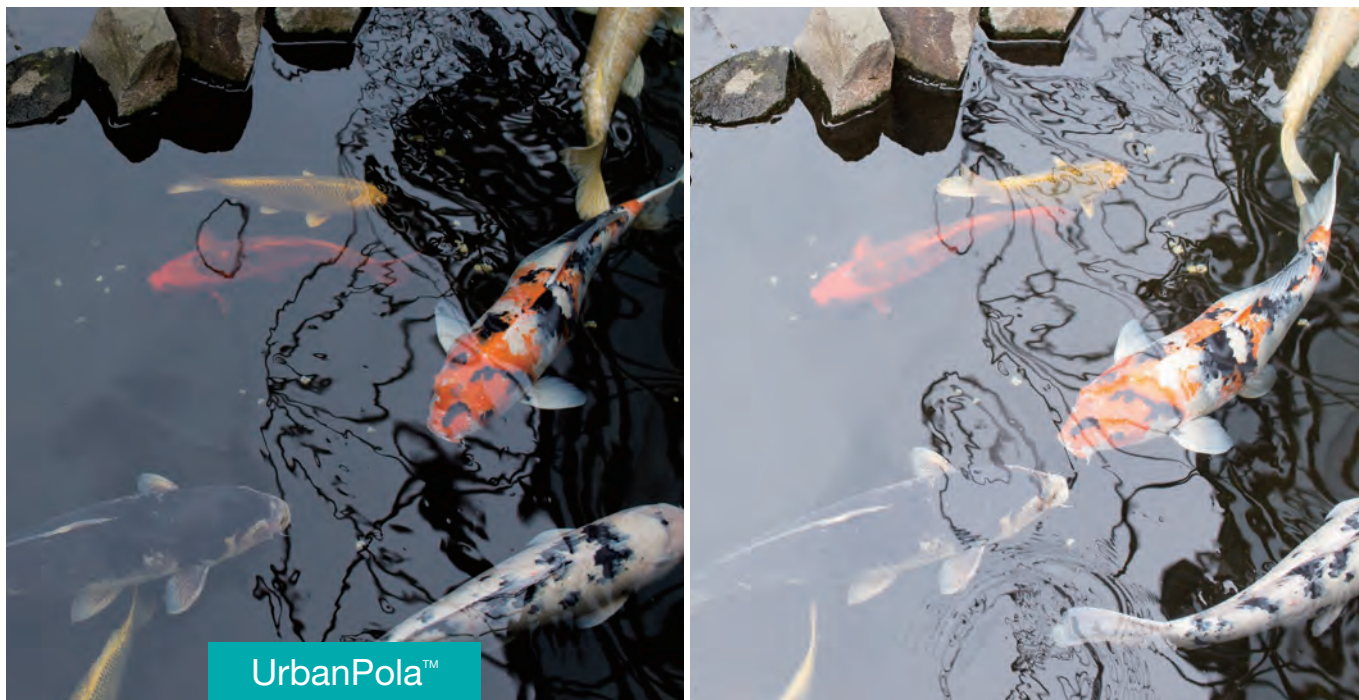

UrbanPola™ is a new polarized technology with complete water resistance.

Clear vision

UrbanPola™

UrbanPola™

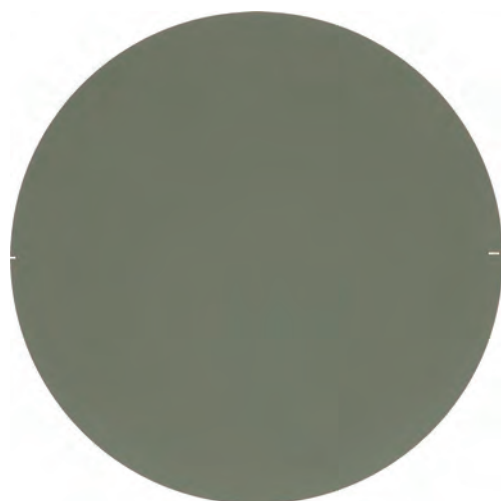

World's first PET-based polarized film which is compatible with MR™ Series.

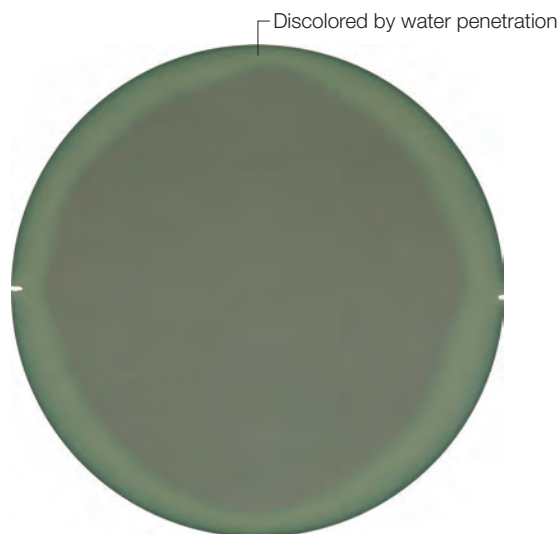

- Laminate structure unites the fine optical properties of MR™ Series with a PET-based polarizing film.
- Excellent water resistance, suitable for water sports and activities such as fishing.
- Lens will not degrade from continuous exposure to water.

Water Resistance Test

(Soaked in room temperature tap water for 100 hours)
